

A close-up, low-angle shot of a dark blue residential door. The door features a prominent silver handle and a matching lock mechanism. The door's surface is textured with horizontal lines. To the right, a portion of the door's glass insert is visible, showing a geometric pattern of diamond shapes. The lighting is dramatic, highlighting the metallic sheen of the hardware against the deep blue of the door.

DOORS AND WINDOWS

The Origin Residential Door

Introducing the Origin Residential Door...

The first clue to your home's character

Unlock your home's potential with the Origin Residential Door, where security and aesthetics are superbly combined.

The Origin Home, a collection of the finest quality products, exquisitely designed and skilfully manufactured in Great Britain by Origin, is proud to now feature the Origin Residential Door.

With innovation at the forefront of everything we do, the philosophy of the Origin Residential Door is certainly no different - it's a precision driven and expertly engineered thing of beauty.

Manufactured with a high-grade aluminium, it's available in a vast range of striking panels, designs and styles, enabling you to create your desired look with ease... Because first impressions matter.

An entranceway
to be proud of...

While an external door is an essential part of any home or building – providing security and thermal insulation – Origin believes that it's more than merely an entranceway. It's a statement piece, as unique and individual as you – offering the first glimpse of your home's interior style and character.

As the Origin Residential Door is completely bespoke, it means it can be made into a true personal reflection of you and your home's style. Manufactured precisely to your size, taste and colour scheme, there's an Origin Door out there for you. So whether it be for a new-build, an existing property, a modern apartment or even a garage, our doors are guaranteed to make an impact, turning your entranceway into a truly unique focal point.

Bespoke to you...

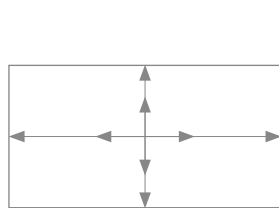

your door, your way

Your home, your doors – with all the little details just as you want them. As with everything Origin, all of our products are bespoke to you, and the Origin Residential Door is no exception.

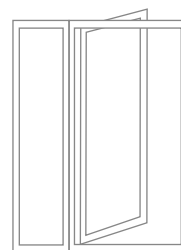

We understand that no two doors are the same, which is why our comprehensive range of low-maintenance, highly insulated and secure residential doors are available in a variety of styles, features, colours, accessories and finishes to suit all tastes.

From the sizing and colours, through to the panel style and hardware choices, you're in control.

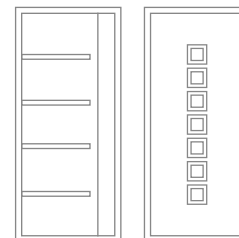

To create your perfect Origin Residential Door, follow the steps below and let us take care of the rest.

Panel choices...

Make a statement

From modern to traditional, there's a panel for every taste

External doors can make a huge impact on the kerb-appeal of a home – and with 35 innovative and classically-stylish panel choices to choose from, Origin allows you to design a perfect statement door that complements your existing architecture and reflects your individual style.

The panel is manufactured with a highly efficient Thermimax core, and is finished with aluminium inner and outer layers, so you can be assured of optimum thermal and security performance.

Perhaps you want to choose a panel with lots of glass panes in to create a grand entranceway that floods your hallway with natural light, or maybe you'd prefer a more traditional understated look for more privacy. No matter your need or taste, there's a suitable panel that will offer the perfect aesthetic fit.

For example, choose from classical Victorian and Georgian styles that never go out of fashion. Or, if you're after an ultra-modern feel, our sleek, solid aluminium panels provide a touch of contemporary sophistication to your exterior.

Mid-rail option

Helping further broaden your design possibilities, Origin offer the option of having a mid-rail pre-installed. Elegantly executed, the mid-rail is fixed horizontally, and is available in two options – one

being a 60:40 split, and the other a 50:50 split. Perfect for porches, they can either accommodate glass on the top and bottom, or a panel can be installed in the bottom section for additional privacy.

Inspired by colour...

set the tone of your home

Whatever your colour preference, with over 150 different RAL shades to choose from, you can be sure to find one that suits your taste – no matter how subtle or outrageous it may be.

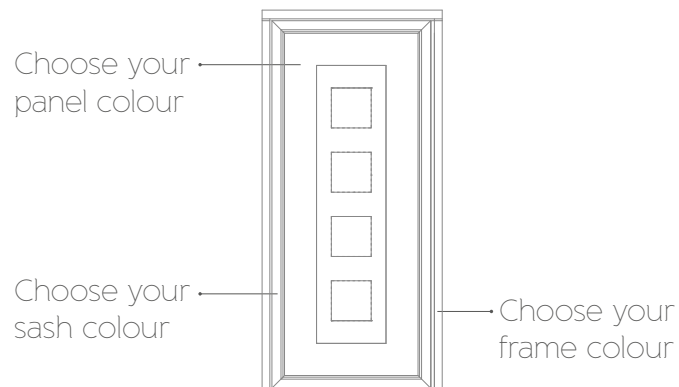

Ranging from bright primary shades through to candy pastels and deeper earthy tones, the extensive colour palette is guaranteed to offer inspiration to homeowners and interior designers alike. Of course, the usual favourites of black, white and all of the popular metallic shades in between are also on offer.

Additionally, we offer a dual colour option. This is offered on both the frame as well as the panel, so this means that the exterior colour(s) can complement the building style, while the interior can blend in or contrast with your internal colour scheme.

Don't be afraid to go for a bold hue that makes your entranceway pop. Or for a more subtle look, a more conservative colour will complement most interiors. Popular combinations include a vibrant red or blue door paired with white frame for a friendly high-contrast aesthetic. Or for a fresh seaside feel, a light and dark blue juxtaposition works wonderfully. And if it's a classic contrast you're seeking, nothing beats a timeless black and white pairing.

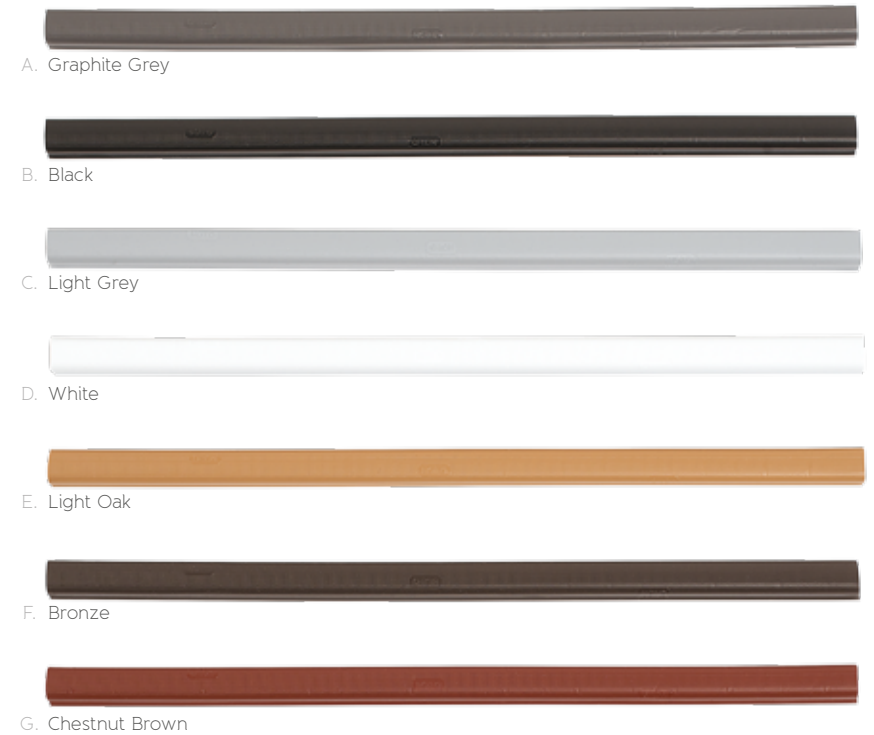

For a truly traditional touch, we also offer authentically styled woodgrain effects, which offer all of the benefits of aluminium with none of the maintenance requirements that wood often needs, providing the best of both worlds.

Many of our RAL colours also come with the option of a matt, satin or gloss finish, giving you plenty of choice to make a great first impression.

Seal colours...

Your personalisation options are virtually limitless with Origin. So much so that you're able to colour coordinate the Q-Lon seals to the frame or panel. To the right demonstrates the seal colours available, and to assist with this choice, we've outlined the popular frame choices that it often goes with.

	Recommended Door Colour	Q-Lon Colour
A.	7015M, 7016M and 9007M	Graphite Grey
B.	9005M and 7021M	Black
C.	9006M	Light Grey
D.	9910G	White
E.	Natural Oak and Golden Oak	Light Oak
F.	Walnut	Bronze
G.	Mahogany	Chestnut Brown

Colours shown here may not be 100% representative.

Visit your local showroom or contact Origin directly for physical samples.

Accentuate your architecture...

It's the little things
that count...

While functionality and security come as standard with every Origin product, the finer details are never overlooked. In fact, it's the nuances and attention to detail that set us apart. From premium quality handles and door pulls, to unique door-knockers, spyholes and letterboxes – our exclusive suite of hardware components perfectly complement your door, adding interest and accentuating your chosen architectural style.

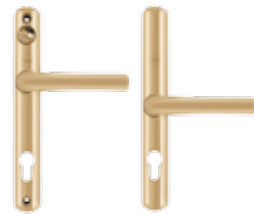

Getting a handle on things...

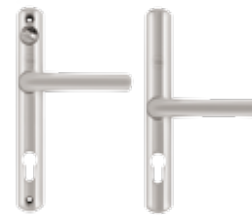

The handles of an Origin Residential Door are the perfect finishing touch to the exquisitely designed system.

Choose from a selection of elegant handle styles that have been designed and manufactured with the same level of care and dedication as every other component. In addition to striking the optimum balance between superior strength and sleek design, our handles are exhaustively cycle-tested to ensure they mirror the flawless functionality of the doors themselves and will, therefore, stand the test of time.

Hafi straight bar
1200mm or 500mm

Hafi offset bar
1200mm or 500mm

Only available in a brushed stainless steel finish.

Knock knock...

There are a number of stylish accessories that you can add to your Origin Residential Door, including letterboxes, knockers with spyholes and security bar restrictors, to ensure your practical requirements are met.

Exclusive suite
of hardware to
complement
your door

Urn style knockers are available in chrome and gold.

The slimline choices are black, white, chrome, gold and stainless steel.

For a more classic home or property, opt for the Affinity Urn knocker, a timeless design that combines modern practicality while retaining traditional character. If a contemporary and streamlined look is more your style, our vertical slim line knocker is the perfect accompaniment. Both styles are fitted with an integrated spyhole, escutcheon plate, and leave no unsightly bolts on the inside of your door.

Our door furnishings don't end there, you can also add a letterbox to your Origin Residential Door. Designed to keep the warmth in and the cold out, our sleek letterbox with contoured edges is available in 5 different colours to complement any finish. The fully sprung external flap opens to 180°, making it easy for your A4 letters to post through. Plus, it contains an external weather seal and internal draught seal to protect your home from the elements.

Security bar restrictors

Chrome

Gold

The Origin Residential Door also offers the option of having a security restrictor put on. This is designed to limit the door opening prior to visitors entering - it's easy to apply and release.

Unsurpassed security...

No matter how aesthetically pleasing an external door is, its main function is to provide your home with security, which is why the Origin Residential Door has been designed with heightened security in mind.

All of our doors are equipped with a multipoint locking system and 3 star barrel as standard. There are 2 different locking mechanisms able to be specified, and these are determined by the handle choice.

For doors with a bar or pull bar handle, a 5-point automatic locking system with key only access will be supplied. This lock allows the user to simply shut the door and turn the key without the need to lift the handle first. For those who opt for the Yale security lever handle, then these will be supplied with our unique 8-point multipoint lock mechanism with an offset spindle function. When selected as a French door, the Origin Residential Door will have a finger bolt to lock the slave door in place.

8-point multipoint locking system

Combining a sophisticated style and elegance with the very latest in high performance, the Origin Residential Door is guaranteed to keep a home safe and secure from intruders. Chamfered 20mm linear bolts offer a smoother operation when engaging the lock, as well as giving maximum compression for increased weather resistance.

Add deep throw 25mm security hooks - the deepest engagement available on the market today - and the lock delivers the best in both security and weatherproofing.

Barrel choices

The weakest point of a locking system is often the barrel, but for us, there are no weak points.

We offer 2 types of locking barrel, both of which are 3 star British Kite Marked - the standard barrel, and the 3 star with coded magnetic keys for the highest level of security. The barrel choices are proven to protect against snapping, picking, drilling and bumping, offering a proven defence that is second to none. Either barrel can be selected on any handle and lock options.

Additional security features

As standard, the Origin Residential Door comes with specifically designed hinges, which have been engineered to withstand attack to offer little opportunity for even the most determined intruder. Without compromising on aesthetics, these hinges can be colour coordinated in any RAL or are available in stainless steel. All of this, on top of the innately robust and strong aluminium profile and panel composition, makes for an ultra-secure system.

Seamless access...

For easy access and protection against the elements, our expertly crafted Origin Residential Door offers 3 thermally broken threshold options for a minimalistic transition between the inside and out.

Sharing the same great technology as the Origin Bi-fold Door, the weathered and non-weathered threshold options are available, so you can pick the right option for your home depending on how exposed to the elements it will be.

Our cleverly engineered weathered threshold ensures your home is kept watertight and weather protected, no matter what the elements throw at you.

The non-weathered options offer a level floor-finish and allow for a seamless transition between the inside and out. They are largely recommended for internal usage, so are an ideal option for flats, doors enclosed in a front porch, or doors that aren't fully exposed to the weather.

Options are the standard non-weathered option, or the specifically designed mobility threshold, standing at just 20mm when the door is open, thus allowing suitable access for wheelchair use.

3 threshold options are available

Mobility threshold

The strength of high-grade aluminium...

Style and slim sightlines are nothing without strength and security – and our aluminium provides both; bringing benefits you can see as well as those you can't.

As with all things Origin, the aluminium we use is far from average. Comprised of only prime, premium-grade billets, it's exceptionally strong, yet weights 67% less than steel. And because our aluminium isn't made up of re-melted scraps, it means we have superior control over its formulation, allowing a better overall finish to be achieved.

In terms of the benefits you can't see – aluminium's innate strength makes the doors physically secure, virtually maintenance-free, energy-efficient and highly durable. It is also resilient to the elements, so the frames won't flex, warp or corrode in varying weather conditions.

As for the benefits you can see – you only need to look and feel an Origin Door to understand. The stunningly slim frames are finished with the highest-grade powder coating available, resulting in a superior, scratch-resistant, ultra-smooth surface.

It's the combined quality, strength and durability that aluminium brings which allows Origin to provide such long guarantees.

Designed to endure...

Exclusively designed, developed and manufactured by us in our state-of-the-art UK factory, the Origin Residential Door has been engineered to perform and built to last.

Our in-house research and development team works tirelessly to make sure that every component, manufacturing technique and feature (such as security, thermal efficiency and safety) is optimised.

Needless to say, our attention to detail doesn't stop there. At each stage of the manufacturing process, our doors undergo rigorous quality testing to ensure they leave the advanced Origin factory at a consistently unparalleled standard.

It's this continual quest for perfection, combined with uncompromising quality control and precision engineering that makes the quality of our doors very rare – putting Origin at the forefront of design and manufacturing excellence.

So, when you choose an Origin Door, you're guaranteed something special. In fact, we're so sure of our craftsmanship, that we offer an industry-leading guarantee of 20 years as standard – giving you ultimate peace of mind.*

*Please note: the frames, locks and finish will be covered by a 20 year guarantee. However, panels will be limited to a 5 year warranty.

Thermal efficiency...

Combining style with thermal performance, the Origin Residential Door has been expertly engineered to optimise energy efficiency, security and aesthetic appeal.

Whether you choose a solid panel or opt for part glazed door, you can be assured of thermal efficiency and comfort in your home all year round for reduced energy bills.

The Origin Residential Door frame and sash features an advanced polyamide break to limit heat transfer from the interior to the exterior, and the panel is composed of inner and outer layers of aluminium with an ultra insulating Thermimax core.

Additionally, the Origin Residential Door makes use of some of the most sophisticated weathertight seals to keep the elements out, come rain or shine.

It's elegance without compromise.

Safety first...

Few things are more important than safety in your home, which is why the Origin Residential Door has been designed with this in mind without compromising on kerb-appeal. The doors boast finger safe gaskets, as well as sophisticated threshold options, which minimise boundaries, making them ideal for wheelchair use.

Optional safety add-ons are also available, such as our security bar door restrictors and knockers with integrated spyholes. And because of the stringent quality control Origin has over all elements, including component performance tests, training regimes and quality control at each stage of the manufacturing process, it means that stress, worry and concern are replaced with complete peace of mind.

Low maintenance...

An inspiration in both design and function, the Origin Residential Door utilises high-quality materials to offer architectural flexibility, unsurpassed craftsmanship and extreme durability.

Unlike timber or uPVC, aluminium is resilient to the elements, so our frames won't flex, warp or corrode, meaning that their alignment will remain unaffected over its lifetime.

Its impeccable powder coated finish doesn't absorb water or attract contaminants, so removes the need for periodic painting and maintenance. Its scratch resistant finish also protects your door from colour fading, ensuring it keeps its pristine looks for years to come.

With Origin, the only limit is your imagination...

The advanced manufacturing techniques that Origin employ allow the Origin Residential Door to be tailor made in all different shapes, sizes, and designs. From

single doors and French doors that can be used in a home or garage, through to grand entrance ways with side flags and/or transom windows, we've got it covered.

Front Door

Available as a single or a French door, Origin's panel choices are guaranteed to give your home's entranceway an injection of character. Whether it be bold, subtle, traditional or modern, the choice is yours.

Garage Door

In order to create a seamless look between the front of house, the Origin Residential Door system can be used as a garage door. Set up as a French door, it offers the option of coming with no threshold.

Configurations to suit any aperture

When looking at sizing and configurations, a single door can be as narrow as 400mm, as wide as 1130mm and as tall as 2700mm. Whether you go for a single door or a timeless French Door, you're able to easily add Origin Windows to the sides or top as fixed panes (flags) to ensure it can fit into an aperture of any size.

Not only will adding Origin Windows let in an abundance of light, but it will also offer a wholly truly cohesive look, inside and out, by selecting matching doors and windows for a visually stunning effect.

Doors can also be manufactured to open in or out, ensuring they meet your spacial as well as stylistic requirements.

A close-up, low-angle shot of a dark, possibly black, door handle and lock mechanism. The handle is a simple, rectangular, recessed design. The lock is a cylindrical, push-button style. The background shows the vertical lines of the door frame and a diagonal line from the handle's mounting. The lighting is dramatic, highlighting the textures and metallic sheen of the hardware.

Practical information...

The Manufacturer

In the fenestration industry, the brand of the product is rarely the company that manufactures it. A major consequence of this method means that quality can vary drastically between one manufacturer and another, and there is therefore no guarantee that the doors produced are to the parent company's specification and quality standards.

This is where Origin are different. Unlike the rest, Origin keep full control of the product from start to finish.

The Next Step...

Once you're set on turning your house into an Origin Home through the installation of award-winning doors, windows and blinds, contact Origin via the details on the reverse.

From here, our expert customer service team will be able to answer any additional questions you may have, or will be able to direct you to your local accredited Origin dealer.

Our nationwide network of trade agents are carefully selected and extensively trained to ensure you receive the greatest quality product backed with a reliable and helpful service.

Visit your local showroom to view the Origin Home range. Your accredited Origin partner will be the one undertaking your installation, so they will be best placed to discuss your project and costs with.

Origin is the UK's leading manufacturer of aluminium architectural solutions.

Now award winning and operating internationally, Origin began in 2001 as a family company dedicated to the design, creation and manufacture of the UK's best quality doors, backed by uncompromising levels of service.

Cousins, Neil Ginger and Victoria Brocklesby, have since worked relentlessly to perfect the design and functionality of doors, and to create and maintain the highly respected reputation for quality and service that they have today, while expanding the range to include windows and blinds.

As the business has continued to grow and diversify, the foundations of family ethos, pride and ownership in all stages of production firmly remain.
